

EXPERIENCE YOUR WORLD

The latest in home audio, video and
lighting from Lighting by Design
and Audio/Video by Design.

Where Past Experience and Future Technology Meet

For more than 20 years, Lighting by Design has used the latest state-of-the-art tools and leading lighting design software to create lighting solutions for the finest landscapes and homes on Long Island and in the tri-state area. Our sister company, Audio/Video by Design, offers turnkey solutions for home theater.

Lighting by Design offers complete design services and consultations for interior, exterior, landscape lighting, retail, commercial, and architectural spaces. We consider ourselves artists. Our palette is light; your home is our canvas. Our designers are ALA-certified and true masters of illumination.

Audio/Video by Design specifies and designs home entertainment systems complete with television, DVD player, theater seats, projection, surround sound—whatever you want, whatever your budget. We do more than provide the equipment, we build to your specifications—from basic entertainment rooms to dedicated in-home theaters.

We can create the ultimate “smart home”, with central access by touch panels.

Where Innovative Designs and Practical Solutions Meet

Create a stimulating atmosphere for a night of entertaining or a quiet feeling of relaxation after a hard day at work—with the touch of a button. Bring music into every room, with individual access points. Instantly adjust the lighting and audio to suit your moods and needs.

The proper interior and exterior lighting makes it easier to perform tasks, adds to a feeling of security, allows a home to be enjoyed to its fullest, and can increase the aesthetic value of your home. Accent a painting, sculpture, or a favorite reading corner. Entertain guests in the backyard—even after the sun has gone down.

Whether you're watching the big game with the guys or having a movie night with the kids, you need the perfect combination.

See how lighting can transform your space.

We can create the ultimate “smart home”, with central access by touch panels.

We create the view that's right for you.

Our services include:

- Interior/Exterior Lighting Design
- Electrical Design
- Structured Wiring Systems

Tasks are easier to perform with the proper lighting.

Built-in panels for computer, TV and surveillance in one place.

We install and program the finest controls and touch screens.

Where It All Comes Together

We can design the perfect solution for your needs and budget.

We take your requirements and expectations seriously, regardless of the scope of the project. We help eliminate the confusion and guide your project from a detailed blueprint to an integrated system.

At Lighting by Design, we are the designers, suppliers, and installers. We work with homeowners, architects, interior designers, contractors, and other creative contributors. We provide CAD drawings, 3D light rendering models, specifications, budget outlines, professional electrical installations, lighting demonstrations, and more. Our involvement doesn't stop there—we fully support all of our installations.

At Audio/Video by Design, we know how easy it is to get lost in the sea of technology. Don't know the difference between HDTV and EDTV, plasma and projection, 5.1 and 7.1 surround sound? Don't worry; we do. We take your individual viewing habits and budget into consideration and design the optimal system for you.

Our commitment to providing innovative and efficient solutions has made Lighting by Design and Audio/Video by Design leaders in our fields. We have successfully completed thousands of projects for corporate events, entertainment venues, and residential, retail, and commercial spaces.
